

**Course Name:**

Structural & Earthquake Engineering Seminar

| | |
|---------------------------------------|--|
| Course Number: 20-925 & 20-927 | Credit: 1 |
| Program: Graduate | Course Type: Technical Required |
| Prerequisite: - | Corequisite: - |

Course Description (Objectives):

This course aims to develop essential skills in scientific research, technical writing, and effective presentation within the field of structural and earthquake engineering. Students will learn how to select research topics, write in a structured and ethical manner, and deliver professional presentations.

Course Content (outline):

- Chapter 1: Research
- Chapter 2: Writing
- Chapter 3: Presentation
